at Somerset House. W very fine &

Warren W. C. recd the sad
news of my Aunt's Death which
took place on Thursday. after
a short illness of a fortnight
alas she had often expressed a
desire to deposit her mortal remains
in Preston Park Yard. her wish
is accomplished. thus after a life
virtuously spent in benefiting
those around her, she has paid
the common debt of Nature
sic transit gloria mundi —
~~and so it is~~ — a debt which
sooner or later we must all
reider. Who can say how many
this hand which now writes shall
remain animated by that un-
known agent, which none can
comprehend, which like the Earth.

of which it is composed is destined to per-
form other offices in the vast economy
of Nature. perhaps to revivify in other
forms. & in each to show the wonder
& wisdom of that Creator. who with
his unceasing & powerful hand gives
& takes away whenever it pleases him
always for the best. This wonderful
structure is within the bounds of
research. but like the machines
of earthly hands. is but a Machine
until assisted by vivifying power
the cause removed the effect ceases.
& Man who boasts of his power & his
Ingenuity, resolves into the common
dust. — The Prince & the Beggar
the Poet & the Philosopher. the Clerk

& the Pool. Scribe to review again

Tuesday May 2nd 1815

At the Wharf. invited to the American
assembly but did not go. Father
dined at the Royal Society's

- W. Gold with occasional falls
of snow wind North.
Messrs Dunlop came here.

Friday Dec 20th

At Wharf employed in drawing
a bonnet Mill. Saw my Blow
Paper used at the Surrey Institution
by Mr Murray which fused
from Platinum & Alumina. Dinner at
Mr.

Saturday Dec 21st

Do. walked to Chiswick Croft.

Sunday Dec. 22nd 1816.

At St James; Church with William
~~spoke~~ on Mr Austin spent 5/6

A very hard frost 16 90 18.
Messrs Constable junr & Mr Ellis
the Mathematician of Marlow.
dined here.

Monday 23rd
Finished Drawing & estimate of the
Corn Mill —. It changed

Tuesday

Employed in writing letters, one
to Mr Playfair &c.

W. dull & cloudy 16. S.W.
At Surrey Institution experiments
with Mr Murray with a German
Blowpipe which exploded but
did no injury —

Wednesday Christmas Day

Went to Church walked in
Kensington Gardens - Dined here
Messrs Mr Ince. Ruston &
nephew. Yates & Jackson.
— Very fine & mild W. H.

Thursday Dec 26.

No men at work at the wharf
as we were repairing the Steam Engine
& Boiler. —

Friday Dec 26

At Wharf taking specific Gravity

Saturday Dec 27.

Done.

Sunday Dec 28.

At home reading
Walked as far as Battersea with
Jenny.

Monday Dec 29th

At Wharf. went in morning
to Mr Lurys about Sugar
& Mill. Pleasantly unexpected
rain all day. W.E. tried Blow
Pipe with Murray at Lurry
Institution -

Tuesday Dec 30th 1816

Specific Gravities in morning

last day of 1816.

During this year I have not
altered my situation in life
I shall continue in the same
position as when I began that
is to joy in in the same uniform

uninteresting mode as former
it is true I have gained expe-
rience in business & perhaps in
general knowledge yet I fear
I have not made that progress
& employed my time in that pro-
fitable way that I should have
done. In French I am nearly
stature quo. in Italian I have
not much advanced. in Mathe-
matics I have not read so much
as to have much profited yet
in theoretical application
I have improved. My professional
knowledge has been occasionally
called in use in making calculations
& drawings - I am tolerably expert.

My funds have been in good
condition I had saved a small
portion about 20 £ which with
the addition of the last August
annuities I counted on applying
to a small Tower. but being
sent to take care of my sisters
at Ramey etc I continued to expend
mainly the whole in various incidental
expenses. In domestic affairs
we stand happily. no losses
or serious diseases have occurred
to any of us & for this happy
preservation we have great reason
to bless Providence for all his ~~preservation~~
- We still possess the same people
around us as formerly - which
with the exception of the death of

Mr. Ruxton Capt^m Myhre
both died in Indian. forms our
greatest loss - In the early part
of the year. William joined the
Frigate Lynceus of 36 guns
as Lieut^t. & subsequently in
August was at the bombardment
of Akyins & came off unscathed
My Father went with Mr
Go. With Jun^r to France &
visited many places with satisfaction
& finally arrived safe home. John
went at his own expense to Paris
about the month of October &
was absent about 3 weeks. William
came home about this time to
stay until a fresh appointment
found him myself & Miss Smith.

came home from Russia & after
staying about 2 months & partly
agreeable enough but I latterly
grew tired & wished to return again
to my affairs in London. From this
time to Christmas I was variously
employed & chiefly devoted myself
to Scientific knowledge. Chemistry
formed the principal part & I expended
in conjunction with John much money
in purchasing the various compounds
relative to it. The Saturday evenings
were usually devoted to it & latterly
on reading the Journal of Science
published by the Royal Institution
purchased a new invented Blow pipe
for which I paid in Dec^r 20 - 3. 10. - 0.

Also about this time on the Friday
& Tuesdays, attended lectures at
the Sundry Institution on Chemistry
by Mr Murray - These are the
principal occurrences with regard to
my pursuits - I have made few
friends, from being much alone
I trust I have lost none by that
conduct & that I have behaved in all
respects worthy of a gentleman
& that I have discharged unto all
men their just debts. I neither
have injured any or been in-
jured - & should he it him to
unjustly attempt to do so to
me. - In short I see very little
to complain of my fate in general

I have been well clothed & well fed
& possess inducements to satisfy my
wants. - Time & circumstances may
eventually produce an improvement
in my affairs - but I bless Heaven
that they have been no worse
so that considering the hardness
& necessity of the times, he is even
well off who can maintain existence
for otherwise is it with me.

G. Perren.

Dec 31st 1816.

Politics have afforded little of importance
Napoleon at St Helena. still
seen throughout Europe. but
and districts of France - except Turkey

is said to be lost. in the Congo of
Serena
